

Aniket Singh

✉ asw51342@gmail.com 📠 9696125497 📍 Kanpur, Uttar Pradesh

Professional Summary

A highly motivated and BTPS Institute certified Full-Stack Developer proficient in designing and developing robust and scalable applications. Possesses a strong foundation in front-end technologies including HTML5, CSS3, JavaScript, and Bootstrap, coupled with expertise in back-end development using Core Java, JSP, Servlets, and database management systems like MSSQL and MySQL. Demonstrated ability to build comprehensive solutions, exemplified by the development of an Employee Management System using Java Swing and MSSQL, improving employee record management efficiency. Further experience includes designing and implementing an Online Recruitment Management System using JSP, Servlet, and JDBC (MS SQL) following MVC architecture, streamlining the recruitment process for both job seekers and administrators. Equipped with practical experience using VS Code, Apache NetBeans IDE, and Eclipse IDE to deliver high-quality software solutions. Eager to leverage technical skills and contribute to innovative projects in a collaborative team environment.

Projects

Employee Management System (Desktop Application)

Designed and developed a desktop application to manage employee records efficiently using Java Swing and MSSQL.

- Designed and developed a desktop application to manage employee records efficiently
- Implemented CRUD (Create, Read, Update, Delete & mark Attendance, Salary calculate) operations for employee data
- Built a secure user authentication system with login functionality
- Enabled advanced search and filter options by employee ID, department, etc.
- Created a user-friendly GUI using Java Swing for seamless interaction
- Established real-time database connectivity using JDBC and MS SQL Server
- Included form validation and error handling to improve data accuracy

Online Recruitment Management System

A web-based application designed to simplify the recruitment process. It provides a platform where job seekers can view available jobs and submit applications online, and administrators can manage job postings efficiently. The system is developed using JSP, Servlet, and JDBC(MS SQL), follows MVC architecture, and ensures security through session management.

- Streamlined job posting and online job applications using JSP and Servlet
- Developed a web-based recruitment management system
- Utilized JSP, Servlet, and JDBC (MS SQL) for development
- Implemented MVC architecture for maintainability
- Ensured security through session management

Employee Management System (Web Application)

Designed and developed a full-stack web-based Employee Management System using Spring Boot and MS SQL Server.

- Designed and developed a full-stack web-based Employee Management System using Spring Boot and MS SQL Server
- Implemented JWT-based authentication and role-based access control (Admin / HR / User)
- Developed CRUD operations for employee records with Soft Delete (ACTIVE / INACTIVE) support
- Built Attendance and Leave Management modules with approval workflow
- Implemented attendance-based automatic salary calculation with bonus and deduction handling
- Integrated REST APIs, validations, and secure database interaction using JPA (Hibernate)

Certifications

Full-stack Developer

BTPS Institute

Skills

HTML5	CSS3	JavaScript	Bootstrap
JSP	Servlets	Core Java	Swing
VS Code	MySQL	Apache NetBeans IDE	Spring
Eclipse IDE	Spring Boot	MSSQL	Hibernate ORM

Education

Bharat Sevak Siksha Sadan I C Armapur Kanpur

Intermediate in High School

2022/07 – 2023/04

Government Polytechnic Unnao

Diploma (BTEUP) in Computer Science and Engineering

2023-09 – 2026-06
